

ELECTRIC PUMP TYPE EPO 3000 NATURAL GLASS 230V 50HZ 29 VA

Model: 0711 21 2305 01 0

Description

PRICE ON REQUEST.

Contact us for more information.

UNI central lubricator type EPO for simple single-line installations.

The UNI central lubricator EPO consists of an electric pump with control valve and a reservoir with a capacity of 3 l.

The pump has been developed for single-line systems and pumps intermittently light- to medium-duty machine- and chain lubricating oil up to a height of approx. 10 meters. (max pressure 1.5 bar)

The distribution to the lubrication points is supplied through the UNI needle control valves type ETR or MTR.

A simple chain lubrication system can be composed with the SPR and SPF lubricating brushes or with the roller brush type RSM.

The control of the pump is carried out either by a control system (PLC) present on the machine or by the freely programmable UNI ignition and pulse generator type TUP1078/1 AL.

To monitor the oil level in the reservoir, the UNI central lubricator can be supplied with a float switch (SSM or SSE) (ordered separately, please contact info@smeertechniek.nl).

Type (inhoud)	A:	B:	C:	Vermogen:	Omg.temp.:	Max. druk:	Opbrengst:
EPO 500	180	100	80	18,5 Kw.	max. 40° C	1,5 bar	21 cm ³ /min. met olie van 65 mm ² /s.
