

SAFETY AIR COUPLER HOSE BLUE 10 MM S1

Model: ISI061810

Description

The ISI coupler is the second series of Prevost, equipped with a new push button system. The blue color at Prevost is the color of the couplings that comply with the ISI 6150-B profile. In addition, the ISI S1 is not only very safe and pleasant to use but it is also efficient and saves you a lot of energy and therefore money.

The ISI is vented and disconnected by a single push of a button. The ISI is of course a coupler that complies with the ARBO standards and ISO 4414 and EN 983. This requires that the coupling that must be vented before it can be disconnected (according to ARBO standards).

The other couplings from the Prevost ranges also meet this requirements, only they require two steps. The ISI couplings are rotatable after assembly. This means that the button can always be turned to a desired position. For your convenience, the connection dimension is engraved inside the coupling.

Specifications:

- operating pressure up to 12 bar
- 833 l / min at a dP of 0.6 bar
- can be used at temperatures from -15 ° C to + 70 ° C
- example weight ISI06.1808: 74 grams
- inter alia interchangeable with: ISO 6150-B / US MIL, Cejn 310, Gromelle 600, Oetiker B1, Rectus 23/24
- antistatic
- bottom: pressure drop of ISI06 and ISI08
