

PELA MANUAL VACUUM PUMP, CAPACITY 6.5 LITERS

Model: PL-650

Description

- Hand-operated vacuum pump type PL-650
- content 6,5 liter
- with set of suction hoses

The original PELA-pump, since 1996. The all-time favourite of technicians because of its strength and durability. The PELA-pump only needs 4 up to 15 strokes to create a powerful vacuum. The integrated 6,5-liter reservoir 'catches' the oil, which prevents spilling. Because of the transparent, calibrated reservoir the user knows exactly how much oil has been pumped. A built-in float switch automatically stops the suction when the maximum capacity has been reached. with a nozzle the reservoir can be emptied again. The integrated pumpcase makes the Pela-650 a durable, maintenance-free unit..
