

MECLUBE GREASE FOLLOWER PLATE FOR SUCTION TUBE Ø30 - 30-50KG (Ø370)

Model: 014-1064-030

Description

It is advisable to always use the follower plate, especially with high viscosity and low temperature grease.

Due to the vacuum, created by the pump, the follower plate will be pushed down by the prevailing atmosphere.

This will push the grease into the pump and prevent air bubbles. The follower plate also scrapes the grease of the barrel wall.

Technical data

Inner diameter (mm)	Ø 335-360 mm
---------------------	--------------

Specificaties

Shank diameter	Ø 30 mm
----------------	---------

Follower plate	Ø 370 mm
