

## **GRACO MSP ELEMENT 10T RVS**

Model: 562758

## **Description**

The Trabon MSP Stainless Steel Series sets the industry standard for quality, reliability, and ease of use features. It was the original modular-style series progressive divider valve and is still the best!

You get more durability with the same high-quality performance and precision machining as the carbon steel version.

The stainless steel MSP valves and accessories overcome harsh conditions, such as salty air or areas needing repetitive cleaning, with durable 303 materials and a design with proven success.

- Quick change valve sections can be removed from the base assembly without disturbing any lube lines - minimising labour cost and maximising your machine uptime.
- Accessories such as magnetic and electronic proximity switch cycle indicators provide positive assurance of a successful lube event.
- Alternate outlet on face of valves can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.
- Built-in outlet check valves ensure accurate lube delivery every time.
